JUNIOR PENETRATION TESTER · OFFENSIVE SECURITY

✉ annasrio1997@gmail.com

📍 Béziers, France

🌐 LinkedIn

➡ GitHub

📄 Audit reports

🔧 Custom toolkit

Available immediately · Seeking a junior penetration tester position

🎯 SKILLS

🛡️ Active Directory

Enumeration, Kerberos abuse (AS-REP, Kerberoasting), ACLs and delegation, ADCS, lateral movement

🔗 Network and infrastructure

Mapping, exposed services, pivoting and tunnelling, Windows and Linux privilege escalation

🌐 Web applications

OWASP Top 10, injections, authentication bypass, IDOR, file upload, SSRF

🔪 Post-exploitation

Credential harvesting, hash cracking, persistence, lateral movement

📄 Reporting and methodology

CVSS v3.1, MITRE ATT&CK, PTES, OWASP WSTG, client debriefing

🔧 Scripting

Bash, Python, PowerShell, enumeration automation

🔧 TOOLING

Nmap

Burp Suite

BloodHound

NetExec

Impacket

Responder

Mimikatz

Rubeus

Certipy

Hashcat

John

ffuf

SQLmap

Metasploit

Ligolo / Chisel

Wireshark

Kali Linux

Git

Docker

🗨️ LANGUAGES

French

native speaker

English

technical, B1 level

★ STRENGTHS

- Rigour and attention to detail
- Self-driven, technically curious
- Clear written reporting
- Composure under pressure

👤 PROFILE

Career change into offensive security since January 2026, backed by the HackTheBox CPTS certification. I run end to end penetration tests on Linux, Windows, Active Directory and web environments: reconnaissance, exploitation, privilege escalation and lateral movement through to full compromise. Every engagement ends with a professional report covering the attack chain, CVSS scoring and prioritised remediation guidance.

📜 CERTIFICATIONS AND TRAINING

● CRTP · Altered Security Certified Red Team Professional Sep. 2026

Altered Security
(Work in Progress)

● CPTS · HTB Certified Penetration Testing Specialist Jul. 2026

HackTheBox Academy
ID HTBCERT-DAA782C4D2

● Penetration Testing Jun. 2026

Pentesting Security, M2i Training
Recognised by France Compétences (RS register) · ID 2606ANNRIO437

● Penetration Testing Specialist path Jun. 2026

HackTheBox Academy
Professional penetration testing training

🔧 OFFENSIVE PRACTICE

● Penetration testing on simulated infrastructures since Jan. 2026

HackTheBox (Yakuzoh #FR profile) · TryHackMe · PortSwigger Web Security Academy

- Full compromise of Active Directory environments: enumeration, Kerberos abuse, ACL and delegation exploitation, privilege escalation and lateral movement up to domain control.
- Exploitation of web applications and exposed services: injections, authentication bypass, remote code execution, followed by post-exploitation on Linux and Windows.
- Full audit reports: executive summary, detailed attack chain, technical evidence, CVSS scoring and remediation plan.
- Built a personal toolkit of enumeration and automation scripts, published openly on GitHub.

🏢 PROFESSIONAL EXPERIENCE

● Bus driver and VIP driver since 2019

RATPDEV · TRANSDEV · Keolis · Sodia Transport

Position still ongoing, held alongside the transition into offensive security.

- Weekly transport of the ASBH rugby team and regular scheduled bus services.
- Strict compliance with timetables and safety procedures, including in difficult traffic conditions.
- Incident handling, passenger relations and daily sense of responsibility.
